***Allowable Subject Matter***

1. Claims 2-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 2, Ogawa discloses a circular polarized wave reception antenna comprising a monopole antenna comprising a pole portion extending in an axial direction and a ground plate for grounding one terminal of the pole portion, the pole portion having a length of  $\lambda/4$ , where  $\lambda$  represents a resonance wavelength; and a polarization converting arrangement, disposed around the monopole antenna, for converting a circular polarized wave into a linear polarized wave. Ogawa, however, fails to specifically teach that the polarization converting arrangement comprises a plurality of helical leads which helically extend along the pole portion and which are separated from the pole portion by a predetermined distance, wherein each of the helical leads includes an end which is grounded in the ground plate.

Claims 3-9 are allowed for depending on claim 2.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
